Mathematical Methods in the Applied Sciences

CONTENTS

VOLUME 19, Nos 1–18

Issue No. 1, 10 January 1996

Relationship Between the Albedo and Scattering Operators for the Boltzmann Equation with Semi-transparent Boundary Conditions: H. Emamirad and V. Protopopescu 1

Decay Estimates for Solutions of Linear Elasticity for Anisotropic Media: M. Stoth 15

Sufficient Conditions for Converging Drift-Diffusion Discrete Systems: Application to the Finite Element Method: A. Nachaoui and N. R. Nassif 33

On the Growth of the Vorticity Support for an Incompressible Non-viscous Fluid in a Two-dimensional Exterior Domain: C. Marchioro..... 53

Graded Mesh Refinement and Error Estimates for Finite Element Solutions of Elliptic Boundary Value Problems in Non-smooth Domains: T. Apel, A.-M. Sändig and J. R. Whiteman 63

Issue No. 2, 25 January 1996

The Approximation of the Optimal Control of Vibrations—A Geometrical Approach: J. Read 87

The Global Attractors for the Periodic Initial Value Problem for a Coupled Non-linear Wave Equation: G. Boling and Y. Linge..... 131

Local Solutions of Semilinear Wave Equations in H^{S+1}: H. Pecher 145

Issue No. 3, February 1996

Approach to Equilibrium for the Coagulation–Fragmentation via a Lyapunov Functional: I. W. Stewart and P. B. Dubovskii 171

Indexed or abstracted by Applied Mechanics Reviews, Boundary Elements Abstracts, Cambridge Scientific Abstracts, Compumath Citation Index, CC/Phys. Chem & Earth Sciences, Engineering Index, Engineering Societies Library, INSPEC, Mathematical Reviews, Research Alert, SCISEARCH database, VINITI–USSR Academy of Science and Zentralblatt für Mathematik.

The Limiting Absorption Principle for Elastic Wave Propagation Problems in Perturbed Stratified Media ^{3}: S. Shimizu 187

Multidimensional Oscillations for Non-linear Hyperbolic Mixed Problem: The Justified Non-linear Geometric Optics Method: A. Łada 217

Measure-valued Solutions of the Euler Equations for Ideal Compressible Polytropic Fluids: D. Kröner and W. M. Zajaczkowski 235

ERRATUM 253

Issue No. 4, 10 March 1996

ANNOUNCEMENT 255

Monodromy Groups and Bilinear Monodromy Invariant Combinations of Generalized Hypergeometric Type Integrals: F. Constantinescu and F. Neumann 257

The Child–Langmuir Asymptotics of the Vlasov–Poisson Equation for Cylindrically or Spherically Symmetric Diodes Part 1: Statement of the Problem and Basic Estimates: P. Degond, S. Jaffard, F. Poupaud and P. A. Raviart 287

The Child–Langmuir Asymptotics of the Vlasov–Poisson Equation for Cylindrically or Spherically Symmetric Diodes Part 2: Analysis of the Reduced Problem and Determination of the Child–Langmuir Current: P. Degond, S. Jaffard, F. Poupaud and P. A. Raviart 313

Issue No. 5, 25 March 1996

Lyapunov Stability of a Class of Operator Integro-differential Equations with Applications to Viscoelasticity: A. Drozdov 341

Periodic Solutions of Non-linear Anisotropic Partial Differential Equations: K. Pflüger 363

Asymptotic Behaviour of the Interface of some Non-linear Diffusion Problems: W. Okrasiński 375

Chemical Reactor Dynamics: Stability of Steady States: C. Chicone, Y. Latushkin and D. G. Retzloff 381

Asymptotic Analysis of a Semiconductor Model Based on Fermi–Dirac Statistics: A. Jüngel 401

Issue No. 6, April 1996

Volterra Integral Equation Models for Semiconductor Devices: A. Unterreiter 425

Heteroclinic Solutions for a System of Strongly Coupled ODEs: B. Kazmierczak and Z. Peradzynski 451

Convergence of Velicity Blobs Method for the Euler Equation: D. Benedetto 463
Asymptotic Analysis of Abstract Linear Kinetic Equations: J. Banasiak ... 481

Issue No. 7, 10 May 1996

The Two-dimensional Exterior Stokes Problem, Existence, Regularity and Decay Properties: M. Specovius-Neugebauer 507
Finite Time of Stabilization in the One-dimensional Problem of Non-steady Filtration: J. Filo 529
Connections between Size Functions and Critical Points: P. Frosini 555
Existence, Uniqueness and Mass Conservation for the Coagulation–Fragmentation Equation: P. B. Dubovskii and I. W. Stewart..... 571

Issue No. 8, 25 May 1996

The Riesz–Clifford Functional Calculus for Non-commuting Operators and Quantum Field Theory: V. V. Kisil and E. Ramírez de Arellano..... 593
A Green's Function Approach to Wave Propagation and Potential Flow around Obstacles in Infinite Cylindrical Channels: H. C. Stuwe and P. Werner 607
Existence and Uniqueness of a Solution to the Cauchy Problem for the Damped Boussinesq Equation: V. Varlamov..... 639
Approximation of Neural Network Dynamics by Reaction–Diffusion Equations: R. Edwards..... 651

Issue No. 9, June 1996

Entropy Boundary Conditions in the Theory of Sedimentation of Ideal Suspensions: M. C. Bustos, F. Paiva and W. L. Wendland..... 679
Scattering Frequencies and a Class of Perturbed Systems of Elastic Waves: R. C. Charão and G. P. Menzala 699
The Validity of Generalized Ginzburg–Landau Equations: G. Schneider... 717
The Asymptotic Behavior and Blow-up Properties of Solutions of a Non-local Burgers' Equation: Y.-H. Wu..... 737

Issue No. 10, 10 July 1996

Trend to Equilibrium for the Coagulation–Fragmentation Equation: P. B. Dubovskiĭ and I. W. Stewart 761

Resonance Phenomena in Local Perturbation of Parallel-plane Waveguides: P. Werner 773
Exact Solutions of Discrete Kinetic Models and Stationary Problems for the Plane Broadwell Model: A. V. Bobylev 825

Issue No. 11, 25 July 1996

Asymptotic Stability in an Epidemic System: Y. Feng 847
Homogenization of the Stokes Problem with Non-homogenous Slip Boundary Conditions: D. Cioranescu, P. Donato and H. I. Ene 857
Some Generalized Problems for Polyharmonic Functions: J. Wolska-Bochenek and M. Majchrowski 883
Semi-internal Stabilization for a Non-linear Bernoulli–Euler Equation: M. Tucsnak 897
Fourier–Finite-element Approximation of Elliptic Interface Problems in Axisymmetric Domains: B. Heinrich and B. Weber 909

Issue No. 12, August 1996

On Large Solutions for the Quasistatic Problem in Non-linear Viscoelasticity with the Constitutive Equations of Bodner-Partom: K. Chelmiński 933
On the Initial-boundary-value Problem for the Extensible Beam with Attached Load: M. Grobbelaar-Van Dalsen 943
Scattering by Rough Surfaces: The Dirichlet Problem for the Helmholtz Equation in a Non-locally Perturbed Half-plane: S. N. Chandler-Wilde and C. R. Ross 959
On Integral Representations and Boundary Properties of Spinor Fields: V. V. Kravchenko, E. Ramírez de Arellano and M. V. Shapiro 977
On Variational Models for Quasi-static Bingham Fluids: M. Fuchs, J. F. Grotowski and J. Reuling 991

Issue No. 13, 10 September 1996

Hadamard's Finite Part: D. S. Jones 1017
Global Solutions to a Penrose–Fife Phase-field Model Under Flux Boundary Conditions for the Inverse Temperature: W. Horn, P. Laurençot and J. Sprekels 1053
On the Low-frequency Asymptotic Expansion for some Second-order Elliptic Systems in a Two-dimensional Exterior Domain: W. Dan 1073
An Alternative Method for a Classical Problem in the Calculus of Variations: G. Elnagar and M. Razzaghi 1091

Issue No. 14, 25 September 1996

Critical Exponents for a System of Heat Equations Coupled in a Non-linear Boundary Condition: B. Hu and H.-M. Yin 1099

Approximate Solution to Inverse Scattering Problem for Potentials with Small Support: A. I. Katsevich and A. G. Ramm 1121

On the Blow-up of the Solutions of a Quasilinear Wave Equation with a Semilinear Source Term: J.-P. Dias and M. Figueira 1135

Properties of Positive Solutions for Non-local Reaction–Diffusion Problems: M. Wang and Y. Wang 1141

Issue No. 15, October 1996

Domain Derivatives in Electromagnetic Scattering: R. Potthast..... 1157

A Linear, First-order Shell Model for Transverse Isotropic Material under a Uniform Change of Temperature: A. Pomp 1177

Existence and Uniqueness of Solutions for a Semiconductor Device Model with Current Dependent Generation-recombination Term: D. Wrzosek.. 1199

A Canonical Diffraction Problem with Two Media: K. Rottbrand 1217

On Quasi-static Non-Newtonian Fluids with Power-law: M. Fuchs 1225

A Partial Differential Equation arising in a 1D Model for the 3D Vorticity Equation: S. De Gregorio 1233

On a Free Boundary Problem: A. Boucherif and S. M. Bouguima 1257

Issue No. 16, 10 November 1996

Existence of Global Weak Solutions for Coupled Thermoelasticity under Non-linear Boundary Conditions: M. Bień 1265

Properties of Detonation Waves: J. K. Tegner 1279

Weak Solutions of a Semilinear Hyperbolic System on a Nondecreasing Domain: T. Nagasawa and A. Tachikawa..... 1303

Finite Time Blow Up for a Nonlinear Parabolic Equation with a Gradient Term and Applications: P. Souplet..... 1317

Structural Stability for the Brinkman Equations of Porous Media: F. Franchi and B. Straughan 1335

Issue No. 17, 25 November 1996

An Introduction to the Lie–Santilli Isotopic Theory: J. V. Kadeisvili 1349

A Variational Problem Related to Self-trapping of an Electromagnetic Field: C. A. Stuart and H. S. Zhou..... 1397

Time Decay of the Solutions of the Vlasov–Poisson System in the Plasma Physical Case: R. Illner and G. Rein 1409

Biquaternionic Integral Representations for Massive Dirac Spinors in a Magnetic Field and Generalized Biquaternionic Differentiability: V. V. Kravchenko, H. R. Malonek and G. Santana 1415

Issue No. 18, December 1996

Riemann Problems for 5×5 Systems of Fully Nonlinear Equations Related to Hypoplasticity: M. Shearer and D. G. Schaeffer 1433

Interaction of Elastic and Scalar Fields: D. Natroshvili and G. Sadunishvili 1445

Galerkin Approximation of Weak Solutions of the Drift Diffusion Model for Semiconductors Coupled with Maxwell's Equations: F. Jochmann 1471

Well-posedness of the Hydrodynamic Model for Semiconductors: L. Yeh .. 1489
